PROFILE

Information Technology graduate candidate with practical experience in business process analysis, requirements documentation, system design, and data projects. Experience includes a company website and CMS, SQL-based data preparation, ETL workflows, and dashboards. Seeking a full-time BA, SA, or Data Analyst role. Available November 2026; graduation documentation in progress.

EXPERIENCE

Business Process Analyst Intern | Retail

- Analyzed As-Is / To-Be workflows across product onboarding, pricing, stock, order flow, CMS, and promotions.
- Documented requirements for SAP OTB reporting automation and assessed SaaS consolidation feasibility.
- Mapped API capabilities and assessed AI automation opportunities to contribute to an AI roadmap.

IT Category Executive Intern | Retail / B2B

- Coordinated B2B commercial activities and monitored weekly sales, pricing, and promotions.

SELECTED PROJECTS

Yuyenpensuk Engineering Website & CMS | 2026

- Worked with the company owner to translate needs into user flows and content management features; developed and delivered the company website. Node.js, Express, Docker.

Agricultural Prices Analytics | 2026

- Developed a three-source ETL and PostgreSQL-backed Streamlit dashboard. Validated units, dates, duplicate handling, and comparison rules. The documented October 2026 dataset contains 398 deduplicated records.

AI PPE Inspection - BA Take-home Case Study | 2026

- Prepared scope, elicitation questions, proposed FR / NFR, process flow, acceptance criteria, and UAT scenarios. Analysis proposal; not a deployed AI system.

MotoInsight ETL & Data Analysis

- Combined web scraping and REST API data with cleaning, transformation, CSV / XLSX export, visualization, and a Gradio dashboard using Python and Pandas.

SKILLS

BA / SA: Requirements Gathering, BRD, As-Is / To-Be, Gap Analysis, Feasibility Study, Use Case, UML, DFD, ERD, Database Design, REST APIs, Acceptance Criteria, UAT Planning.

Data: SQL, Python, Pandas, NumPy, PostgreSQL, MySQL, Excel / Sheets, Data Cleaning, Data Validation, Visualization, ETL, Airflow.

Tools: Figma, Draw.io, Postman, Git / GitHub, PowerPoint, VS Code; Generative AI tools with output review.

EDUCATION

Kasetsart University, Kamphaeng Saen Campus | 2023-2026
Bachelor's degree in Information Technology - graduation documentation in progress.
