## PROFILE

Information Technology graduate with project experience discussing business needs with a company owner, translating needs into workflows and developing a public website and CMS. Interested in requirements analysis, process improvement and stakeholder communication.

## EDUCATION

**Kasetsart University, Kamphaeng Saen Campus**
Bachelor's Degree in Information Technology | 2023-2026

## SELECTED PROJECT EXPERIENCE

**Yuyenpensuk Website & CMS**
Discussed website needs with the company owner, designed content-management workflows and developed the public catalogue and CMS. Prepared source-derived requirements, business rules and acceptance scenarios.

**AI PPE Inspection - BA Assessment**
Prepared a proposed inspection workflow, stakeholder questions, functional and non-functional requirements, acceptance criteria and UAT planning. This is an assessment proposal, not a deployed AI system.

**Agricultural Prices Pipeline**
Worked on source integration, validation and presentation of public prices from DIT, NABC and Talaadthai. Dashboard comparisons retain consistent units, measurement types and dates.

## RELEVANT SKILLS

Requirements Gathering | Functional Requirements | Business Rules | Workflow Design | Acceptance Criteria | UAT Planning | Data Flow | SQL | Technical Documentation | GitHub

## LANGUAGE & WORKING APPROACH

English: KU-EXITE 79/100, CEFR B2 (2026). Uses ChatGPT Work to assist research, documentation and coding, with source review and validation before presenting results.
