PROFILE

Information Technology graduate with project experience in data collection, validation, SQL and dashboard workflows. Interested in preparing reliable datasets and explaining analysis with clear source, unit and time context.

EDUCATION

Kasetsart University, Kamphaeng Saen Campus
Bachelor's Degree in Information Technology | 2023-2026

SELECTED PROJECT EXPERIENCE

Agricultural Prices Pipeline
Integrated public prices from DIT, NABC and Talaadthai using Python, Airflow and PostgreSQL. Applied validation and deduplication, with a Streamlit dashboard for filtering and visualization.

GoldSense - Thai Gold Price Tracking
Project uses an HTTP data source and SQLite for price observations and a dashboard. Repository evidence records a price publication; no trained forecast or evaluated model is claimed.

MotoInsight - Data Preparation
Prepared Python source for CheckRaka HTML parsing, CSV export, duplicate removal, missing-value handling and descriptive summaries. A completed dashboard or evaluated dataset is not claimed.

RELEVANT SKILLS

SQL | PostgreSQL | SQLite | Python | Pandas | Data Cleaning | Data Validation | ETL | Airflow | Streamlit | Data Visualization | GitHub

LANGUAGE & WORKING APPROACH

English: KU-EXITE 79/100, CEFR B2 (2026). Uses ChatGPT Work to assist research, documentation and coding, with source review and validation before presenting results.
