PROFILE

Information Technology graduate with project experience in system workflows, data structures and web development. Interested in translating business requirements into clear application boundaries, data flows and implementation specifications.

EDUCATION

Kasetsart University, Kamphaeng Saen Campus
Bachelor's Degree in Information Technology | 2023-2026

SELECTED PROJECT EXPERIENCE

Yuyenpensuk Website & CMS
Developed a Node.js / Express / EJS catalogue and CMS with JSON file storage and image-upload handling. Reviewed public/admin architecture and prepared source-derived data-flow, logical-data-model and endpoint documentation.

Agricultural Prices Pipeline
Worked on an Airflow pipeline with data validation and PostgreSQL UPSERT, plus a Streamlit dashboard reading the database. Defined conditions for comparable price groups.

Animal Adoption - Schema Design
Designed relational entities for animals, adopters and adoption requests, with primary and foreign keys. The repository contains schema-level work; an operational backend is not claimed.

RELEVANT SKILLS

System Analysis | Requirements Traceability | DFD | Logical Data Modeling | Relational Schema | SQL | Node.js | Express | JavaScript | REST Concepts | Docker | GitHub

LANGUAGE & WORKING APPROACH

English: KU-EXITE 79/100, CEFR B2 (2026). Uses ChatGPT Work to assist research, documentation and coding, with source review and validation before presenting results.
